### GeometricObject

-color : String -filled : boolean

-dateCreated : java.util.Date

+GeometricObject()

+GeometricObject(color: String, filled: boolean)

+getColor() : String
+isFilled() : boolean

+setFilled(filled : boolean) : void +getDateCreated() : java.util.Date

+toString(): String

## Triangle extends Geometric Object

-side1 : double -side2 : double -side3 : double

+Triangle()

+Triangle(double : side1, side2, side3)

+setSide1(): void +setSide2(): void +setSide3(): void +getSide1(): double +getSide2(): double +getSide3(): double +getArea(): double +getPerimeter(): double

+toString(): String

#### Account

-accountNum : int-balance : double-annualIntRate : double-dateCreated : java.util.Date

+Account()

+getAccountNum(): int +getBalance(): double

+getAnnualIntRate(): double +getDateCreated(): java.util.Date

+setBalance() : double +setAnnualIntRate() : double

+setDateCreated(java.util.Date): void

+deposit() : double +withdraw() : double

# CheckingsAccount

-overdraft : int

+toString(): String

## SavingsAccount

-overdraft : int

+toString(): String

## Course

-courseName : String -numberOfStudents : int -students : ArrayList<String>

+Course(String : courseName) + addStudents(): String +getStudents() : ArrayList<String> +getNumberOfStudents(): int +getCourseName(): String
